

Dual Provider Switch Products

The line of Suttle Dual Provider Switch Products is designed for a competitive service provider to distribute voice service through a home's existing wiring. With four different switching products, Suttle has the solution to fit all of your switching needs. Reducing service truck rolls, eliminating jack rewiring, and alarm integration are some of the major benefits of the Dual Provider Switch Products.

Flush Mount Switch Jack

The flush mount switch jack from Suttle allows two providers' service to be controlled at the first jack in series through a simple, customer-operable switch. This jack eliminates the need for service truck rolls and jack re-wiring when the service is changed by the home owner. Intended for daisy chained retrofit applications.

<u>Product Number</u>	<u>Description</u>
2-3001S-xx	Simplex switched jack, 4-conductor, screw terminals, filled splice connectors.
2-1001S-xx	Duplex switched jack, 4/4-conductor, screw terminals, filled splice connectors.

Colors (xx): (52) Electrical Ivory, (85) White

Wall Mount Switch Jack

The wall mount switch jack from Suttle allows two providers' service to be controlled at the first jack in series through a simple, customer-operable switch. This jack eliminates the need for service truck rolls and jack re-wiring when the service is changed by the home owner. Intended for daisy chained retrofit applications.
